Summary

As a Full Stack Web Developer with 7+ years of experience in JavaScript and React, I thrive on creating complex UIs and staying current with technology to ensure my projects are both effective and relevant.

I've helped create countless web applications and websites using such technologies as React, Node.js, Next.js, AWS, Postgres and others.

I value writing clean, high-quality code for better performance and maintainability.

Experience

Full-stack Developer

Ivinco

Mar 2022 - Feb 2024 (2 years)

As a Full Stack Web Developer at Ivinco I worked on several key projects.

My primary focus was on developing web applications that required both front-end and back-end expertise, with emphasis on my front-end and Javascript expertise.

The main project I worked on was a complex web application for our client, built using a modern React app on the front-end and a scalable AWS Lambda back-end with NodeJS. The project also involved maintaining and migrating a legacy application.

Besides the main project I also worked on a few internal projects, including our public facing website/blog that uses the latest React/Next.js stack and a slick, responsive design.

Senior Frontend Developer

TOO iSate

Jul 2021 - Mar 2022 (9 months)

As a Senior Front-End Developer at iSate, I specialized in crafting intuitive user interfaces, leveraging the full power of ReactJS and the latest front-end technologies. Here are some highlights of my responsibilities and achievements:

I helped lead the front-end development team, guiding them through complex technical challenges and ensuring the delivery of high-quality code. Actively contributed to the architectural decisions for new features, emphasizing performance, scalability, and maintainability.

As a periodic Scrum Master, I helped facilitate agile ceremonies (daily stand-ups, sprint planning, retrospectives).

I worked closely with UX/UI designers, back-end developers, and the product manager to ensure a seamless development process from conception to deployment.

As a Senior developer, I acted as a mentor for junior developers, providing guidance on technical skills, code quality, and career development.

Full Stack Web Developer

Skazka

Sep 2017 - Jun 2021 (3 years 10 months)

As a sole developer my duties include developing, maintaining and deploying websites and web apps, as well as a range of generic IT tasks.

My stack of choice is all Javascript, with React and Node

Web Developer

E Direct Link Ltd

Dec 2016 - Apr 2017 (5 months)

As one of the web developers my role was creating bespoke websites and web applications using modern JavaScript frameworks such as React for the front-end with various technologies used for the back-end.
